Please kindly find the reviews for your manuscript entitled:
"Analyzing Remanufacturability of Mobile Phones using
DEMATEL Approach".

12:14 PM

in the attachment (Review 1)

Review 2:

This article is recommended for publication on the JTI journal.

Here are some suggested improvements:

1. Tables from the Direct-relation matrix of all Experts 2, 3, and 4 should be combined into a table to be more efficient.
2. Figure 1 is deleted, just explained in Figure 2.
3. It is necessary to explain what are the minimum criteria as an expert.
4. In results and discussions it needs to be linked to the results of previous research. What are the similarities and differences, to see the uniqueness of the results of this study.

In the revised version, please highlighted any changes that you make. Please, also enclose the response to the reviewers in the journal submission gateway.

We wait the revised version up to 17 June 2019.

thank you for considering JTI to publish your work.

Sincerely your

In the revised version, please highlighted any changes that you make. Please, also enclose the response to the reviewers in the journal submission gateway.

We wait the revised version up to 17 June 2019.

thank you for considering JTI to publish your work.
