Topic(s):
- Uncertainty in SCM applications
- Inventory

Keywords: Information technology capability, lean production, vendor-managed inventory, supply chain practices, firm performance

Abstract: Today, global competition entails companies have an advantage in supply chain networks to pursue superior performance. This work examines the link between information technology (IT) capability with the firm performance by adopting a lean production approach, vendor-managed inventory, and supply chain practices. The study has surveyed the population of the manufacturing company in East Java, Indonesia, using a questionnaire with a five-point Likert scale. A total of 111 manufacturing companies (medium and large) were selected from 5420 manufacturing companies listed in the Industrial Department of East Java. The partial least square (PLS) technique was used to analyze the data, using the smartPLS software version 3.3. Thirteen hypotheses in this study were developed to investigate. The result revealed that all hypotheses of direct relationship were supported. IT capability directly affects lean production, vendor-managed inventory, and supply chain practices. Moreover, lean production, vendor-managed inventory, and supply chain practices improve firm performance. Further analysis also indicated that all hypotheses of indirect hypotheses were supported except hypothesis one hypothesis (H9). IT capability indirectly improves firm performance through lean production, vendor-managed inventory, and supply chain practices. This result provides insight for managers and policymakers on enhancing firm performance by improving its IT capability, adopting lean production, vendor-managed inventory, and supply chain practices. This research contributes to reinforcing the supply chain management theory.

Dear Zeplin

We inform you that your article has been accepted, but need major revision

Reviewer # 1

The article needs to be corrected to fit the required format

Abstracts need to be made to be more comprehensive by contributing to practical applications

In order to make the research phenomenon clearer, it is necessary to add the latest references related to information technology (IT) capability

Citation and references need to be researched and checked, because there are some citations that do not have references

The relationship between concepts to build a hypothesis is good, but it is necessary to add the latest research from the results of previous researchers

The tested hypotheses need more detailed discussion and need to be compared with the results of previous studies

Reviewer # 2

The format for writing the article is not appropriate, if necessary the journal has provided it according to the APC that has been set

There are thirteen research hypotheses, then the results and discussion should follow.

Tables 1, 2,3,4 and 5 need to be adjusted to the journal format

The discussion needs to be detailed

The model as data processing output needs to be added

Sincerely
Farhang

Zeplin Jiwa Husada Tarigan <zeplin@petra.ac.id>

Dear Bapak Farhang

We have been working on improvements as requested by reviewers 1 and 2, and we need your help to be able to make our articles according to the journal format with APC Team, according to the information we got

Thank you very much,

Zeplin Jiwa Husada Tarigan

Dear Author

I have received the comments from one of the reviewers and it appears that the paper could be considered for publication should it go under careful editing. We have a group of people who could do this and in case they do the editing your paper will be accepted. The cost of our service is \$700USD. However, it is not obligatory and you may use your own service. If you wish to use our service please let me know, otherwise, feel free to upload a high quality paper using the [UPLOAD](#) option.

In case you wish to use our service, please let me know so that I could send you details of the payment.

Sincerely
Farhang

Dear Zeplin

Kindly, please find the invoice. You may use the following two options to make the payment.

1. PayPal: In this case you could make \$700USD+4%=\$729USD to our account: growingcience@gmail.com
2. Bank account: Please make \$700+15\$=\$715USD to the following bank account

Account Holder First Name: Seyed Jafar
Account Holder Last Name: Sadjadi
Bank Name: CIBC
Bank Address: 27 King St N, Waterloo, ON N2J 3Z6, Canada
Transit Number: 00452
Bank Account: 9088636
International Bank Swift Code: CIBCCATT
Tel.: Phone: +1 519-886-2960

The address of the bank account holder is also as follows,

970 Melbourne Ave
North Vancouver BC,
V7R 1N9 Canada

Once you make the payment, we will keep you informed shortly.
