Topic(s)
- Supply Chain Management
- Production Management

Keywords: Green employee behavior; green operation; green purchasing; Internet of things

Abstract: Many people are aware of taking care of the global environment, so they demand environmentally friendly business activities. The government also has responded to the commotion by requiring companies to produce friendly and safe products or services to their customers. Hotel industries react to it by implementing the concept of green hotels. The purpose of this study is to examine whether the Internet of Things, strategic green purchasing and green operation have impacted green employee behavior in star-hotels in East Java. Eighty-two (82) questionnaires were distributed, but only 62 questionnaires were valid, with a response rate of 75.60 %. SEM-PLS (Structural Equation Modeling Partial Least Square) was used to analyze the data. The results show that the Internet of Things (IoT) has a significant impact on green hotel operation, with the T-statistic value of 0.378; green purchasing has a significant impact on green hotel operation, with the T-statistic value of 0.545, and green employee behavior, with the T-statistic value of 0.346. Internet of things (IoT) has no significant impact on green employee behavior directly but through green hotel operation. The use of energy efficiency and the existence of good waste management as indicators of green hotel operation has an impact on green employee behavior of 0.346.

Dear Author

Here are the results of your article review

Review # 1

The Indonesian Hotel and Restaurant Association (Perhimpunan Hotel dan Restoran Indonesia/PHRI) deleted writings or sentences that are not international languages.

Needs to be improved in detail and carefully to fit the MSL journal format

Novelty articles have been written and are relatively good, need an explanation related to green hotel implementation as a research phenomenon

Add literature on IoT, so that it is clearer in its implementation based on the results of previous research

Provide an explanation regarding descriptive analysis on measurement items

Review # 2

Overall the article is good and in accordance with the scope of the journal; It is necessary to explore the implementation of green hotels and IOT

An explanation is needed regarding the validity and reliability of the test

Provide a more detailed explanation related to the results of the research hypothesis in the discussion

Make sure the results in Figure 1 and Table 5 must match, and the format needs to be corrected

Give research limitations and research suggestions for future researchers

Sincerely
Sadjadi

Dear Sadjadi

Improvements for Review 1, we have done well. We have also done the same thing for the 2nd review. However, it is very difficult for us to adapt to the requested format, we hope we can be helped by your APC team.

Best Regards

Zeplin Jiwa Husada Tarigan

Dear Author

I have received the comments from one of the reviewers and it appears that the paper could be considered for publication should it go under careful editing. We have a group of people who could do this and in case they do the editing your paper will be accepted. The cost of our service is \$700USD. However, it is not obligatory and you may use your own service. If you wish to use our service please let me know, otherwise, feel free to upload a high quality paper using the UPLOAD option.
In case you wish to use our service, please let me know so that I could send you details of the payment.

Sincerely
Sadjadi
