Dear Oviliani Yenty Yuliana,

On behalf of the ICEAST2021 academic committee, I am pleased to inform you that your manuscript has been accepted for publishing in the proceedings you selected and presentation at The 7th International Conference on Engineering, Applied Sciences and Technology (ICEAST 2021). As the ICEAST2021 is converted to the virtual conference and held on 1-3 April 2021, we take this opportunity to invite you to give the online presentation of your research, as detailed below.

Title : The Effect of Information Technology Implementation on Supply Chain Performance through Information Sharing and Supply Chain Collaboration
Track : Journal - Current Applied Science and Technology (CAST)
Status : Accepted

Next, You will get the notification email for Camera-Ready submission. Please prepare your manuscript with final proofreading before publication.

Please visit the conference website for the registration information.

<http://iceast.kmitl.ac.th/2021/registration/>

If you have further inquiries, please contact us at email: iceast2021@kmitl.ac.th
or Line ID: @iceast2021

Sincerely,
The 7th International Conference on Engineering, Applied Sciences and Technology (ICEAST 2021)

Dear Mrs. Yuliana,

Thank you for registering for the Editorial Manager online submission and peer review tracking system for Current Applied Science and Technology .

Here is your username, which you need to access Editorial Manager at <https://www.editorialmanager.com/cast/>.

Username: oviliani@gmail.com

If you do not know your confidential password, you may reset it by clicking this link: <https://www.editorialmanager.com/cast/l.asp?i=1852&l=E6QPC347>

Please save this information in a safe place.

You can change your password and other personal information by logging into the Current Applied Science and Technology website and clicking on the Update My Information link on the menu.

Best regards,

Current Applied Science and Technology

In compliance with data protection regulations, you may request that we remove your personal registration details at any time. (Use the following URL: <https://www.editorialmanager.com/cast/login.asp?a=r>). Please contact the publication office if you have any questions.

ICEAST2021 - Journal Manuscript Submission

Title: The Effect of Information Technology Implementation on Supply Chain Performance through Information Sharing and Supply Chain Collaboration
MS. No.: ICEAST_PID228

Dear Oviliani Yenty Yuliana,

According to your submission of your work presented in ICEAST2021 to Current Applied Science and Technology Journal, your manuscript has passed pre-review from our academic committee your manuscript is in scope of the journal. You are accordingly invited to submit the above-mentioned manuscript to the journal for the blind-reviewing process via the submission system of the link [Editorial Manager®](#) . For submission, please fill out the cover letter attached to this email and submit along with your manuscript. Please make the submission before **May 25, 2021** to avoid the reviewing process.

Regards,
Wisanu Pecharapa
ICEAST Technical Program Chair and section editor of Current Applied Science and Technology Journal

Dear Dr. Wisanu Pecharapa,

Thank you very much for the information passed pre-review. I have submitted the article for our blind review on Editorial Manager® on 04-04-2021. However, I haven't uploaded the cover letter for submission yet. There appears no menu to upload other documents, such as the cover letter. Please let me know how to upload the cover later?

Thank you very much for your attention Dr. Wisanu Pecharapa.

Sincerely yours,

Oviliani

Dear Dr. Wisanu Pecharapa,

Almost a week ago, I replied to your email that I could not upload the cover letter to the CAST Journal website. But I attached the letter to the previous email. Sorry, I want to ask, should I upload the cover letter and the manuscript without affiliation to the CAST website as a new submission paper?

Thank you very much for your kind attention.

Sincerely yours,

Oviliani

Article Title: "**The Effect of Information Technology Implementation on Supply Chain Performance through Information Sharing and Supply Chain Collaboration**"
Current Applied Science and Technology

Dear *Mrs. Yuliana*,

Reviewers have now commented on your paper. You will see that they are advising that you revise your manuscript. If you are prepared to undertake the work required, I would be pleased to reconsider my decision.

For your guidance, reviewers' comments are appended below.

If you decide to revise the work, please submit **a list of changes or a rebuttal against each point** which is being raised when you submit the revised manuscript.

Your revision is due by **2021-10-04 23:59:59**.

To submit a revision, go to <https://www.editorialmanager.com/cast/> and log in as an Author. You will see a menu item call Submission Needing Revision. You will find your submission record there.

Yours sincerely,

Asst.Prof.Warangkhana Kimpan, Ph.D.
Section Editor
Current Applied Science and Technology

Comments from the Editor and Reviewers :

Reviewer #1:

Because the variables in this study have been explored before in other studies, the author should discuss on how this study enhance the knowledge or important implications of the relationship between IT, IS, SCC and SCP compared to other studies.

Additionally, the author should add the questionnaire used in this study, how to develop the questionnaire and how to selected an informant in the chosen manufacturing companies to answer the questionnaire. Furthermore, the types of the chosen manufacturing companies should be displayed. These types of information would be beneficial in finding out if there is an bias in the answers in the questionnaire.

It is also suggested that the process of indicator selection should be provided. The clarification of the non-IT, non-IS, non-SCC and non-SCP including their cross-loading values in section 3.1.2 should be added.

For the descriptive results of IS indicators in 3.1.1, it shows that the average is lower than 4.00 and "Neutral" is greater than 20% of the answer. This should be taken into account for the discussion and the implication of this study.

There are also few mistypes in the manuscript. In section 2.2, volume or capacity flexibility, and production costs should be SCP3 and SCP4, respectively. The author should also consider re-write the explanation in 3.1.1.

Reviewer #2:

The study aimed to determine the effect of information technology implementation on supply chain performance through information sharing and supply chain collaboration in Surabaya, Indonesia. It was written well. Literature reviews included the topics of Information Technology Implementation (IT), Information Sharing (IS), Supply Chain Collaboration (SCC), Supply Chain Performance (SCP) and their relationship. They were up-to-dated. The research methodology was appropriated, which used a quantitative approach to measure the effect between an independent variable (IT), mediating variable (IS, SCC), and dependent variable. The population of this study was 206 manufacturing companies with more than 100 employees. The sample size of 70 respondents was calculated using Slovin [1], which was appropriate. The data was analyzed using Partial Least Square, which was a structure equation modeling technique. Most of the results were clearly

explained. However, in order to be consistent with others, the author might change the sentence from "... non-IS' cross-loading values (0.149~0.671) are lower than IS' (0.703~0.9).." to be "... IS' cross-loading values (0.703~0.9) are higher compared to non-IS' (0.149~0.671) in Line 41 below Figure 2.

This paper could benefit to practitioners with insight to the importance of IT, IS, and SCC to pursue superior SCP. Also, manufacturing companies that want to improve their supply chain performance can adopt the results of this study. In addition this paper could contribute to the current research in supply chain management.

Reviewer #3:

*Why would you use a non-probability sample instead of a probability sample?

*Why you ignore the collinearity between the exogenous constructs?

*R Square should be greater than 0.20, but R Square of IS is less than 0.20.

In compliance with data protection regulations, you may request that we remove your personal registration details at any time. ([Remove my information/details](#)). Please contact the publication office if you have any questions.

To: Hotlan Siagian <hotlan.siagian@petra.ac.id>

Dear Authors,

Regarding your manuscript EM 00054 "The Effect of Information Technology Implementation on Supply Chain Performance through Information Sharing and Supply Chain Collaboration" which you submitted to the Current Applied Science and Technology journal. Now, this paper has been edited in English grammar by an editor and native speaker.

However our editor would like you to recheck and rewrite the red highlight, please find the attached file and revise or reply to us. Please send the revision file back to us via this email within December 27, 2021. Thank you.

Best regards,
The CAST secretariat

Dear CAST secretariat,

We thank you very much for your information regarding our article. As you requested, we have improved the paper based on your comment as follows.

1. We have corrected the authors' affiliation become: Faculty of Business and Economics, Petra Christian University, Surabaya, Indonesia.
2. We have revised the citation and References to make it inline between citation-sequence numbers in the text with the list of references.
3. We have edited several phrases marked red color to make the phrase proper and meaningful.
4. We have also edited the Figure to make it match between Figure 1 and 2, particularly on the variable name. We have also edited some text in order to tailor all the variable names and their abbreviations.

Please find attached the revised paper and you can see the changes on tracking changes.

Once again, We thank you very much for your consideration to publish our paper in the CAST Journal.

Best regards
Hotlan Siagian
