Topic(s):

- Project management
- Project procurement

Keywords: Village development project planning, natural and cultural tourism, village economic sustainability

Abstract: Tourism village development projects have become attractive to the community during the Covid 19 Pandemic and after. This condition is caused by many people in urban areas who wish to travel to natural and indigenous cultural destinations. Tourism village development is a process that emphasizes ways to develop or advance tourist villages. Village green tourism development projects through natural and cultural destinations are expected to provide sustainable village economic sustainability. The distribution of questionnaires to obtain the potential for village tourism development was determined by the project team that will develop in identifying, assigned consultants and key people from local villages, including leaders with a total of 46 respondents. Data processing looks at the relationship between village economic sustainability and village economic sustainability through natural and cultural tourism potential using partial least squares. The data processing results show that the village tourism development project has a positive effect on nature tourism potential, cultural tourism potential, and village economic sustainability by increasing the welfare of local communities. The nature tourism potential of the village, which has attractive mountains and a reliable source of

agricultural products, is capable of impacting the local community's interest. Cultural tourism potential owned by the village with attractive tourist performances on a regular and well-scheduled basis and the ability of the village to show dance performances that reveal their identity can impact the village's economic sustainability. The village green tourism development project is set in the finalization stage of project planning by considering the project completion time

Dear Zeplin

We received several things that needed to be fixed from the two reviews, namely:

Reviewer # 1

- The study surveyed 46 respondents. It is necessary to add to the abstract
- Novelty of the research can not be found clearly. Please add.
- Provide additional explanation related to Table 1.
- Each table can be given an adequate explanation
- Provide additional theoretical and practical contributions to the conclusion section
- References adapted to the journal template

Reviewer # 2

- The abstract needs to include a more detailed contribution so that it has an impact on the village to make valuable changes
- The objective of the articles can be completed at the end of the introductory section
- Add literature and discussion from previous research related to the Village Tourism Development Project.
- need to describe the characteristics of respondents
- Conclusions need to be adjusted to the results of research and discussion
- The references should provide additions from the intended journal.

Sincerely
Sadjadi

Dear Zeplin

I have received the comments from one of the reviewers and it appears that the paper could be considered for publication should it go under careful editing. We have a group of people who could do this and in case they do the editing your paper will be accepted. The cost of our service is \$1000USD. However, it is not obligatory and you may use your own service. If you wish to use our service please let me know, otherwise, feel free to upload a high quality paper using the UPLOAD option.

In case you wish to use our service, please let me know so that I could send you details of the payment.

Sincerely
Sadjadi

Dear Mr. Sadjadi
I hope you are well and healthy

We are delighted and we thank you that our article is considered to be published in your journal. However, we hope that you can give us a discount for the edition fee. We do not get any funding from our university for the publication so that we have to pay for it ourselves.

We do hope that we could pay USD 700 for the editing fee. Thank you very much for your consideration.

Sincerely,

Zeplin Jiwa Husada Tarigan
