

*“Only those who seek refuge are able to survive”.*

For almost three years, this country has been attacked by the pandemic. Slowly but surely, everything seems to have come to a halt. Life has since changed and turned into chaos without exception. Humans are separated and isolated from one another, stuck and alienated. Everyone keeps their distance, and human activities have become necessary to be distanced. That cursed virus separates everything, even forever. Parents have to be separated from their children, husband from wife, brother from sister, lover from beloved, teacher from colleague, student from friend, and friend from their confidant. Tears, cries, and lamentations tarnish the peace and beauty of Indonesia. The pandemic has shattered happiness and destroyed hope.

This photo is a representation of optimism for a beautiful future, about the certainty that God will help us. Humans are blessed with knowledge and skill to survive and ward off disasters. This photo portrays a tough and brave woman who continues her life and works hard amidst the Covid-19 storm. She remains smart and elegant even though she has to be confined and covered.
