About Scopus Author Identifier

The Scopus Author Identifier assigns a unique number to groups of documents written by the same author via an algorithm that matches authorship based on a certain criteria. If a document cannot be confidently matched with an author identifier, it is grouped separately. In this case, you may see more than one entry for the same author. ×

International Journal of Computational Methods

Country Singapore

Subject Area and Category Computer Science
Computer Science (miscellaneous)
Mathematics
Computational Mathematics

Publisher World Scientific Publishing Co

Publication type Journals

ISSN 02198762

Coverage 2006-ongoing

Scope The purpose of this journal is to provide a unique forum for the fast publication and rapid dissemination of original research results and innovative ideas on the state-of-the-art on computational methods. The methods should be innovative and of high scholarly, academic and practical value. The journal is devoted to all aspects of modern computational methods including - mathematical formulations and theoretical investigations; - interpolations and approximation techniques; - error analysis techniques and algorithms; - fast algorithms and real-time computation; - multi-scale bridging algorithms; - adaptive analysis techniques and algorithms; - implementation, coding and parallelization issues; - novel and practical applications.
